Richards Bay Resource Science

Centre To whom it may

concern

I wish to testify that the CASME resource centre has been of good use to the school for sometime now. The school started to use the centre in 2017 and our learners are doing better in their performance. Teaching in the Correctional facility it's the challenge as our learners cannot visit the centre so borrowing the equipment makes it better for them. They have prescribed experiments so we rely on these equipments to perform them. We always receive the equipment on time and in good condition. The service is very good. We hope the centre will continue and be of good use to us and for the benefit of our learners.

We really appreciate the service we are receiving and our learners are exposed to the use of laboratory equipment same as all other learners with laboratories in their schools.

Thank you

SN Msomi (Educator)
