

My name is Miss Nomcebo Mathenjwa. I teach Natural Sciences and Technical Sciences at Richards Bay Secondary School.

Our school has been affiliating with the CASME Resource Center since I started teaching in 2015.

The resource center has assisted our science immensely because it made our informal experiments and formal practicals efficient, realistic and interesting. Our students are able to use apparatus with confidence and enthusiasm. All our formal practical marks have been outstanding because of the center.

I would definitely recommend the science center to all schools. They will not regret it.
