

My name is Samkelo Andile Ntuli I was in Richards Bay Secondary School from year 2019 - 2023.

I was doing Technical Sciences in grade 10-12. Our teacher would always borrow from the CASME Science Center whenever we are supposed to do experiments whether it was formal or informal. It was always so interesting and see how science is fun and easy it is when it was practical. This helped our PAT marks (Practical Assessment Task) because we always used to excel in our practical aspect of science.

I would really advice any school that is lacking resources to affiliate with the science center. You will not regret it.

SA Ntuli.
