

Resource Centre Testimonies

My name is Ps Bonisiwe Chiliza from **Umkomaas Secondary School**. I have been getting assistance from Casme resource centre since 2022 when they moved their offices to Umlazi, Canaan College.

The resources I receive from the centre were and are very useful in assisting me with my lesson planning for my sciences lessons. As a science educator working government in schools with no resources for practical lessons. Casme has provided and closed the gap through the process of affiliation charging very little for us to borrow and use their science equipment for our classroom practical lessons. Thank you casme for the opportunity to make a difference in our learners' lives.

My name is Miss P. Tembe from **Umgijimi Primary School** based at Umlazi. We have been getting assistance from casme under one of their projects works since 2021. They have been assisting us with educator and learner academical development through educator workshops and learner support visits. The project has ended and we still getting assistance through the process of affiliation at very little cost. So much has improved and a lot of achievements have been accumulated and all thanks to casme.
